

Hands-on Practical Test 2
COMP 010: Information Management
Using SQL Pre-Written Functions

Name: Marck Jedrick Mabalot		Score:
Course/Section: BSIT 2-2	Date: 05/26/2026	

General Instructions:

Create tblPayroll database below then execute the following SQL queries to retrieve the required information. Use only **one SQL statement per item/number**.

Take a screenshot of each SQL command together with its corresponding output/result, then paste them into this document.

You are given **1 hour** to complete this activity, including the conversion/uploading of the PDF file to the assigned folder in our Google Classroom. Please manage your time wisely and ensure that your work is submitted before the deadline.

Good luck, and God bless!
